

MOHAMMAD OSAMA MINHAS

AI AGENT ENGINEER · LLM ORCHESTRATION, AUTOMATION & SELF-HOSTING
CA FINALIST (ICAP) · AUDIT, ASSURANCE & IFRS S1 / S2 SUSTAINABILITY REPORTING

osama.minhas111@gmail.com · +92 333 4707011 · P-60, St 3, Satellite Town, Faisalabad, Pakistan

■ PROFILE

AI agent engineer and automation specialist who builds, wires and self-hosts production agentic systems — Claude Code, OpenAI Codex, OpenCode and OpenHands — connected to multiple LLM backends and layered with persistent memory, custom skills, MCP tooling and Docker-based local deployment. Certified across applied AI, agentic workflow design and n8n automation engineering. I bring a second edge most AI engineers do not: a CA Finalist's assurance discipline in IFRS, ISA and IFRS S1 / S2, so the systems I build carry evidence trails, controls and verifiable output rather than unvalidated prose — precisely where AI deployments fail in regulated, finance-heavy environments.

■ AI ENGINEERING PROJECTS

- **Autonomous Crypto Trading Agent**
24/7 unattended trading system built through Claude Code — data ingestion, strategy logic, risk controls and persistent session state.
- **ContentOS — Autonomous Content Pipeline**
n8n workflow factory automating research, scripting, asset generation and multi-platform publishing as a multi-agent system.
- **Zero-Cost AI Video Generation Stack (Open-Weight Model)**
Open-weight Wan 2.2 video model deployed on ComfyUI over serverless GPU (Modal, A100) with authenticated endpoints and budget controls, wired into n8n — replacing paid video APIs at near-zero marginal cost.
- **Self-Hosted Local Agent Environment**
OpenHands and agent runtimes under Docker with persistent volumes, isolated networking and configurable LLM backends.

■ CORE COMPETENCIES

- **Agentic Coding Harnesses & LLM Integration**
Operate Claude Code, OpenAI Codex, OpenCode and OpenHands as production execution environments. Connect any harness to any model backend — Anthropic, OpenAI, Gemini, Qwen, Llama, Kimi — via API keys, OpenAI-compatible base URLs, routing gateways and local inference runtimes, with model selection tuned for cost, context window and task complexity.
- **Agent Memory, Skills & Self-Evolving Systems**
Engineer persistent memory layers (CLAUDE.md / AGENTS.md, project- and user-scope), reusable Skills, slash commands and sub-agent delegation. Design evaluation feedback loops in which agents log outcomes, correct their own instruction sets and extend their skill libraries across successive runs.
- **Docker, Local Deployment & Self-Hosting**
Containerised and localhost deployment of n8n, OpenHands, Odoo and agent runtimes using Docker and Docker Compose — image builds, volume persistence, port mapping, environment and secret management, WSL2 on Windows, and controlled external exposure via reverse proxies and secure tunnels.
- **MCP & Tool Orchestration**
Configure and build Model Context Protocol servers — filesystem, terminal, browser, email, drive and database — and bind them to agent harnesses. Design tool schemas, permission scopes and structured outputs so agents act reliably on real systems rather than returning unverified prose.

AI & TECHNICAL STACK

AGENTIC HARNESSSES
Claude Code · OpenAI Codex · OpenCode · OpenHands · Manus

LLM BACKENDS
Claude · GPT · Gemini · Qwen · Llama · Kimi (API & Web UI)

AUTOMATION
n8n · MCP Servers · Apify · Airtable · Webhooks & REST APIs

INFRASTRUCTURE
Docker · Docker Compose · Localhost
Self-Hosting · WSL2 · Git

AUDIT & FINANCE
Inflo Audit Platform · Odoo ERP · Advanced MS Excel · MS Office

STANDARDS
IFRS · IFRS S1 & S2 · International Standards on Auditing (ISA)

CERTIFICATIONS

Google AI — Professional Certificate
Coursera (Google) | 7 Courses

Practical AI Agents 2026: Build Agentic Workflows
Packt | Coursera

FOCUS AREAS

- AI-Augmented Audit & Assurance
- IFRS & Sustainability Reporting
- Agentic Workflow Engineering
- Automation, Docker & Self-Hosting

LANGUAGES

ENGLISH
Full professional proficiency

URDU
Native

– Process Automation & Multi-Agent Workflows (n8n)

Certified n8n automation engineer. Build recursive multi-agent pipelines using webhooks, REST API integrations, conditional routing, error handling and scheduled triggers for compliance reporting, content operations and high-volume batch execution.

– Prompt Engineering & AI Fluency

Anthropic-certified in the AI Fluency framework — structured delegation, description, discernment and diligence. Apply disciplined prompt architecture, capability and limitation mapping, hallucination control and context-window management across both API and web interfaces.

– Deep Research, Data Management & Lead Generation

Google-certified in applied and responsible AI. Use Mirofish for deep research and predictive scenario simulation, and Apify for large-scale data extraction across Tier-1 markets (USA, UK, Canada, Australia); Airtable and advanced MS Excel for structured tracking and reporting.

■ PROFESSIONAL EXPERIENCE

Sami & Co. — Management Consultant

Faisalabad, Punjab, Pakistan · Full-time · On-site

● Sustainability Associate

JUL 2026 – PRESENT

- Contribute to sustainability and ESG reporting engagements under IFRS S1 (General Requirements for Disclosure of Sustainability-related Financial Information) and IFRS S2 (Climate-related Disclosures).
- Support disclosure mapping, data collection and documentation of sustainability-related risks, opportunities and climate metrics for reporting entities.
- Build AI-assisted research and data-extraction workflows to accelerate standards interpretation, evidence gathering and drafting of disclosure notes.

● Audit Associate

MAY 2026 – JUL 2026

- Performed external audit procedures for a UK-based client in accordance with International Standards on Auditing (ISAs), covering planning, fieldwork and completion.
- Executed engagement documentation and analytical review on Inflo, the firm's cloud audit platform, maintaining a complete and reviewable audit trail.
- Tested income, expenditure, bank and cash balances and prepared supporting working papers, reconciliations and schedules.
- Applied IFRS to the review of financial statements, disclosures and supporting notes; developed practical Odoo ERP capability for client-side accounting and system-based control testing.

■ EDUCATION & QUALIFICATIONS

PROFESSIONAL QUALIFICATIONS

Chartered Accountancy | CA Inter

Institute of Chartered Accountants of Pakistan (ICAP)

Assessment in Fundamental Competencies (AFC) Qualified · Certificate in Accounting and Finance (CAF) Qualified

Associate Degree in Commerce

2023 – 2025

Government College University, Faisalabad (GCUF)

ACADEMIC QUALIFICATIONS

F.Sc Pre-Medical

2015 – 2017

Punjab College of Science

Matriculation (Science)

2012 – 2014

Blessing Home High School

PUNJABI
